## Shingle Tiles

**Ironwood Shingles** are a traditional roofing material in Indonesia. This type of roofing first originated in Kalimantan, Borneo, where it has been used for hundreds of years for housing, due to its strength, aesthetic appeal and weather resistance. Ironwood Shingle dimensions are 570 x 75 mm.

**Western Red Cedar Shingles** are widely used in North America, and Europe. Cedar shingles are 520mm in length and vary from 100-200mm in width.

Designed to withstand our extreme climate, all our shingles are 100% waterproof when installed correctly, with a life expectancy of over 20 years.

- 100% waterproof
- Require minimal maintenance
- Mould & mildew resistant
- Termite resistant
- Long lifespan and durability

Recommended Tile Spacing	150mm
Recommended Minimum Roof Pitch	30 degrees
Recommended Rafter Spacing	500 – 650mm

## Da Vinci Shingles

Da Vinci shakes offer a fantastic alternative to the natural shingles, with the advantages of durability and a lifetime manufacturer's warranty. With a USA Class A fire rating, Da Vinci tiles make a great choice for commercial projects and DIY projects alike.

The aged cedar effect tiles come in 520mm length and vary from 100-200mm in width. They replicate the natural colour, texture and size variation of a natural tile to give an authentic look to your next roofing project.

- 100% waterproof, and wind-resistant.
- USA Class A fire rating.
- Long lifespan and durability.

Recommended Tile Spacing	250mm
Recommended Minimum Roof Pitch	30 degrees
Recommended Rafter Spacing	500 – 650mm

*Timberline Charcoal*

*Royal Sovereign*

Recommended Minimum Roof Pitch	20 degrees
Recommended Rafter Spacing	650 mm
Manufacturer's Warranty (Timberline)	50 years
Manufacturer's Warranty (Royal Sov.)	25 years

## GAF Asphalt Shingles

GAF asphalt shingles are quickly becoming a popular choice for roofing gazebos in Australia. The minimalist colours and outline of the shingles give a contemporary look that is highly sought after.

Ashphalt roofing shingles are fibreglass mats, ingrained with asphalt and ceramic granules. They are a lighter alternative to tiles, with a much stronger result. Comparative to traditional tiles, they are also safer to walk over, have no algae growth and maintenance free. They have a higher thermal rating than metal and won't scratch or dent.

The process of installing asphalt shingles, begins with plywood sheeting to cover the roof, followed by 'deck armour' a one-way, breathable, membrane. The shingles are then fastened to the sheeting using flat-headed roofing nails.

With a long manufacturer's warranty, and low square meter price, you won't find a better value roofing material for your gazebo.
