## Viro Thatch - Synthetic

Viro Thatch Synthetic Bali tiles are an excellent long lasting alternative to both natural African & Bali Thatch.

Viro thatch is manufactured into a 780 x 600mm flexible tile, which can be clipped, stapled, or nailed onto existing structures for quick, no-fuss installation.

The Viro thatch sub-tiles are 780 x 600mm, for use over an existing roof structure such as colorbond to provide that great aesthetic look of thatch.

- 95% waterproof, and wind-resistant.
- Natural insulation offering maximum UV.
- No condensation – making it an ideal application for alfresco areas, and spas.
- Long lifespan and durability.
- 15 years manufacturer’s warranty

## Viva Palm - Synthetic

Viva Palm by Enduroreed is an excellent alternative to natural Bali Thatch for those wanting the durability of synthetic thatching with the added advantage of 100% waterproofing and fire resistance.

This unique synthetic roofing thatch is formed into a textured shingle and then cut with a pattern to replicate the appearance of natural palm leaves.

Used in resorts around the world including Four Seasons, Aussie World, Disneyworld Hong Kong, and Nashville Zoo, this quality synthetic is suited for commercial projects and backyard renovations alike.

- 20 years manufacturer's warranty.
- Class A Fire Rating (USA), and Australian Fire Test Certificate.
- Wind and weather resistant.
- 100% recyclable.
- Maintenance free.
- Fast, easy installation.
